

2004(04) Aston Martin Vanquish SDP Vanquish

POA

Overview

Mileage	45,500 miles
Fuel Type	Petrol
Engine Size	6 l
Bodystyle	2+2 COUPE
Transmission	Manual
Exterior Colour	Silver
Previous Owners	2
Registration	BU04EOV

Description

The Aston Martin V12 Vanquish was introduced in 2001 as the successor to the DB7. It was designed by Ian Callum and manufactured at Aston Martin's plant in Newport Pagnell, UK.

The V12 Vanquish was powered by a 5.9-liter V12 engine, which produced 460 horsepower and 400 lb-ft of torque. It had a top speed of 190 miles per hour and could accelerate from 0 to 60 miles per hour in just 4.5 seconds.

The car featured an aluminum and carbon fiber body, which made it both strong and lightweight. It also had a 6-speed manual paddle shift transmission, carbon-ceramic disc brakes, and an adaptive suspension system.

The V12 Vanquish received praise for its stunning design, exceptional performance, and advanced technology. It appeared in the James Bond film "Die Another Day" in 2002, further boosting its popularity.

In 2004, Aston Martin introduced a limited-edition V12 Vanquish S, which had an upgraded engine, producing 520 horsepower and 425 lb-ft of torque. It also had a redesigned body, a new suspension system, and several other improvements.

Production of the V12 Vanquish ended in 2005, with a total of 2,578 units produced. It remains a highly coveted car among collectors and enthusiasts, valued for its impressive performance and elegant design.
