Registration	FYV685V

Description

The Aston Martin V8 Volante was introduced in 1978 as a convertible version of the V8 coupe. It was designed and produced by Aston Martin Lagonda Limited, a British sports car manufacturer.

The V8 Volante was powered by a 5.3-liter V8 engine, which was capable of producing 390 horsepower and 401 lb-ft of torque. It had a top speed of 155 miles per hour and could accelerate from 0 to 60 miles per hour in just 5.2 seconds.

The first generation of the V8 Volante was produced from 1978 to 1986. During this time, the car underwent some changes, such as larger bumpers and redesigned headlights. The V8 engine was also improved to produce 405 horsepower.

In 1986, Aston Martin introduced the Series 2 V8 Volante, which featured some significant changes. The car was fitted with a fuel injection system, which improved fuel efficiency and reduced emissions. The interior was also revamped, with leather seats and a redesigned dashboard.

In 1987, Aston Martin introduced the V8 Vantage Volante, which was the fastest convertible in the world at the time, with a top speed of 160 miles per hour. The car was powered by a 430 horsepower V8 engine and had a more aggressive body style.

The V8 Volante remained in production until 1989, with a total of 1,216 units produced over the years. It was a popular car among celebrities, including Prince Charles, and it has since become a classic car, valued for its timeless design and powerful performance.
